

## **Biosecurity Guidelines**

Since 2020, the COVID 19 pandemic has changed our way of life and the way we relate to others, in the face of the waves of COVID 19 infections it has been necessary to implement biosecurity measures to avoid contagion by coronavirus and continue with our activities of accompaniment and solidarity with the communities.

We ask you to sign the document on the application to release and discharge SHARE from and all liability related to COVID.

We have gathered the following recommendations to ensure that your experience in this solidarity mission is pleasant and safe for everyone.

The government of El Salvador as of today (December 7, 2022) is not requesting any requirements to enter the country, but it is necessary for you to consult with your airline any requirements they are asking. We as SHARE strongly recommend you give us Covid negative proof for your, the group and our host safety.

### **Biosecurity requirements to enter El Salvador**

Not vaccinated against COVID-19: They should present a negative COVID-19 result given 72 hours before the arrival to El Salvador (PCR, NAAT or LAMP as well). CHECK FOR REQUIREMENTS BEFORE TRAVELING

Vaccinated against COVID-19: They should present the vaccination certificate with all doses, depending on the type of vaccine. If they have only been given a dose of two: They should present a negative COVID-19 result given 72 hours before the arrival to El Salvador (PCR, NAAT or LAMP). CHECK FOR REQUIREMENTS BEFORE TRAVELING

- El Salvador accepts Antigen test, PCR COVID 19, NAAT, and LAMP as well.

## **GENERAL GUIDELINES TO STOP THE SPREAD OF CORONAVIRUS AND PROTECT THE GROUP**

- **Get a COVID-19 vaccine.**

We have some rules to guarantee that this travel experience is going to be great and safe for everyone.

### **When you go on the bus/or any Transportation**

- If you travel in a group, remember to maintain biosecurity conditions: keep your physical distance and wear a mask
- Use the mask properly (Wearing the mask over your nose and mouth when around others)
- Find out and respect the maximum capacity of a transport or establishment. This is how we all take care of ourselves
- Wash your hands often with plain soap and water. If you can't, use 70% alcohol gel
- Use the trash can inside the transport unit. If it does not have it, request that they place one. Let's keep our destinations clean

### **When you go to eat:**

- Find out about the entry and biosecurity conditions of the place you visit, so that you can comply with them.
- Allows temperature measurement. This measure helps to identify possible infection risks.
- Try to maintain a physical distance, specially if you need to wait in line.
- Disinfect your hands with a 70% alcoholic solution after having contact with surfaces such as tables, doors, menu, cash and others.
- The use of the mask is essential when you are in closed spaces and when you are in open spaces that do not have physical distance of at least 2 meters

## When you visit communities

- Use the mask properly (Wearing the mask over your nose and mouth).
- Remember to wash your hands with soap and water frequently during your visit, and to disinfect your hands with alcohol gel before and after touching surfaces.
- Wash your hands every hour and apply a 70% alcoholic solution for antiseptis, after every social interaction
