

ASOCIACION SALVADOREÑA DE AYUDA HUMANITARIA

PRO-VIDA

¡Con justicia Social habrá agua y Salud para todas y todos!

Project Name: Water and Health for Communities Fighting COVID19

The Salvadoran Association for Humanitarian Aid, PRO-VIDA, has been working in El Salvador for 35 years, hand in hand with the Salvadoran people, following the example of men and women health workers who gave their lives during the war; dreaming of a fair world, egalitarian, with dignity; where children, adolescents and youth are protected, where women enjoy full equality with men, seeking social welfare.

El Salvador is one like so many impoverished countries that has received a strong blow not only because of the pandemic but also because of all the measures applied by the government that have brought unemployment to the people and with it economic crisis to the point that for many families it is impossible to buy basic supplies for their protection and the acquisition of medicines. Given this, an intervention of immediate help to families is proposed with the following criteria: prioritize women heads of household, families with underage children, impoverished communities and with a family member who needs immediate medical attention for having related symptoms to a possible contagion by covid19.

General Objective: Promotion of prevention measures against Covid 19 in the family setting with emphasis on health and water.

Specific Objective: Provide timely attention to low-income families in the municipality of Nejapa for the prevention of covid19 ensuring access to safe water for hygiene at home and for human consumption in quality and quantity.

Expected Results:

- 1.- Medical and psychological care has been provided to person with COVID 19, as well as to the affected family.
- 2- It has contributed to improving access to water to families in the community.

Activities:

Day of medical and psychological care by community
Municipal and community information campaign on Covid 19 prevention measures
Delivery of Community Covid 19 Protection Kits
Quarterly quality analysis of water in 3 communities
Family deworming days at start of project
Children's drawing contest of rationed use of water, via social networks
Youth Mural Contest with the Message: rationed use of water by community painted in a visible space in the community
