Last school year: Third year of high school

Last year's average: 8.4

PAES average: 7.55

Name of the institution to which you will enter: Alberto Masferrer University

Location: 19 Av. Nte. between 3 to Calle Pte. and Alameda Juan Pablo II, San Salvador.

Career / Technician who wants to study: Bachelor of Nursing.

Region of CRIPDES to which it belongs:

What motivates you to want to study the career or coach you have chosen?

I think that nursing is the maximum expression of love for others, to help people when they cross a difficult situation such as the breakdown of their health, to accompany families to take strength, I think we come for a clear purpose to this earth: help, and I feel that through this race I can do my best for this planet.

What is the organizational work you do in your community?

☑ I am currently part of the youth committee formed by CRIPDES, we have carried out various social and environmental activities for more than a year.

☑ I am part of the municipal youth table, as sub-coordinator, a space for the representation of organized youth throughout Tecoluca.

☑ Volunteer as animator of community children's events and paints faces in my community and in various communities of the Municipality.

What is organization for you?

It is a very important and fundamental tool for communities to make progress, so that they can improve the quality of life of everyone in all aspects: social, education, environment; promote coexistence and thus eliminate any type of violence.

What does it mean to be a leader in your community or organization?

Make a difference, encourage more young people to organize and demonstrate that it is something important for us to improve, to move from words to action, as the example is the best tool to invite them to be part. It is to help in everything that can be done to see my community and my municipality are better and more developed.

What do you understand by solidarity?

Love for people and the planet, have the ability to support in any circumstance the neediest and unprotected people, also help rebuild our damaged environment, through actions that serve to raise awareness.

Why are you interested in a scholarship?

As an organized youth, I visualize that there is a need for professionals in the service of the community, the career that I wish to study is based on humanitarian aid, through it I want to transform the reality of health and environment in my community.

Make available all my knowledge to provide quality care to people who because of their economic situation cannot access health services. Promote awareness of how important it is to stay healthy and take care of the environment around us. I am sure that, through good health practices, I can contribute to a healthier, cleaner and safer community for children and the elderly, who are the most vulnerable.

During the course of my baccalaureate that was a technician in primary health care, I had the opportunity to experience the two facets of being a career: the field area, with talks in the communities and in the hospital area, through my social hours; That reaffirmed my desire to continue studying in the

field of health, I consider it a wonderful thing, to see how humans are capable of helping a small baby to be born, to support in the most difficult moments before death. I can say that my most beautiful experience was seeing a birth for the first time, being there and seeing the work that both doctors and nurses do, make that moment something easier for mothers.
